

Digital Manufacturing Commons

Program Review & Workshop Update

James A Barkley

18 September, 2015

Welcome & Opening Logistics

- Wi-Fi
- Online participation
 - <http://uilabs.adobeconnect.com/dmc>
 - Feel free to join the conversation in the chat room, show us your beautiful smile!
 - No mics! If you have a question, please use the Q&A box
 - PLEASE NOTE: We are recording this session
- Community discussion forums for more permanent discussion
 - <http://projectdmc.org/community>

Attendees

- Total registrants = 170
- **Member density (Md) = members/nonmembers**
- In-person Md = 1.63
- Virtual Md = 0.78
- Overall = 1.08

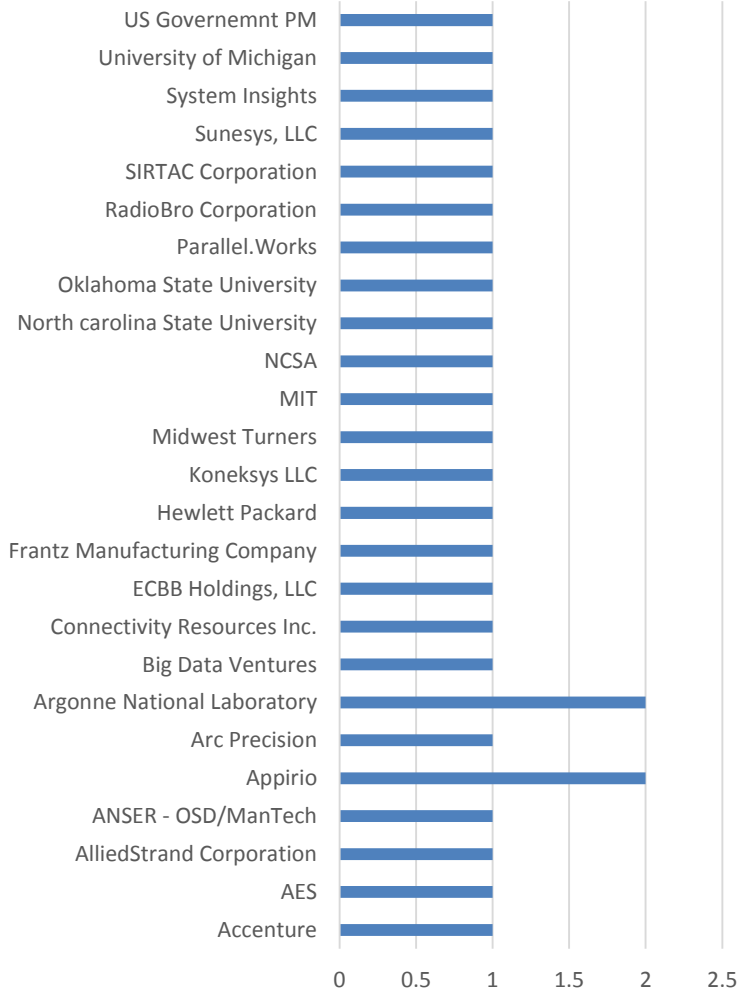

Member Attendees

Nonmember attendees

Attendee Skill Mix

Software experience (5=great)

Manufacturing-related analysis experience (5=great)

Project Call 15-16

- Looking for innovative ideas to:
 - build user communities
 - Establish seed data and applications in the marketplace
 - Demonstrate use cases for real-world mfg. problems
 - Connect the smart factory

Project Call 15-16

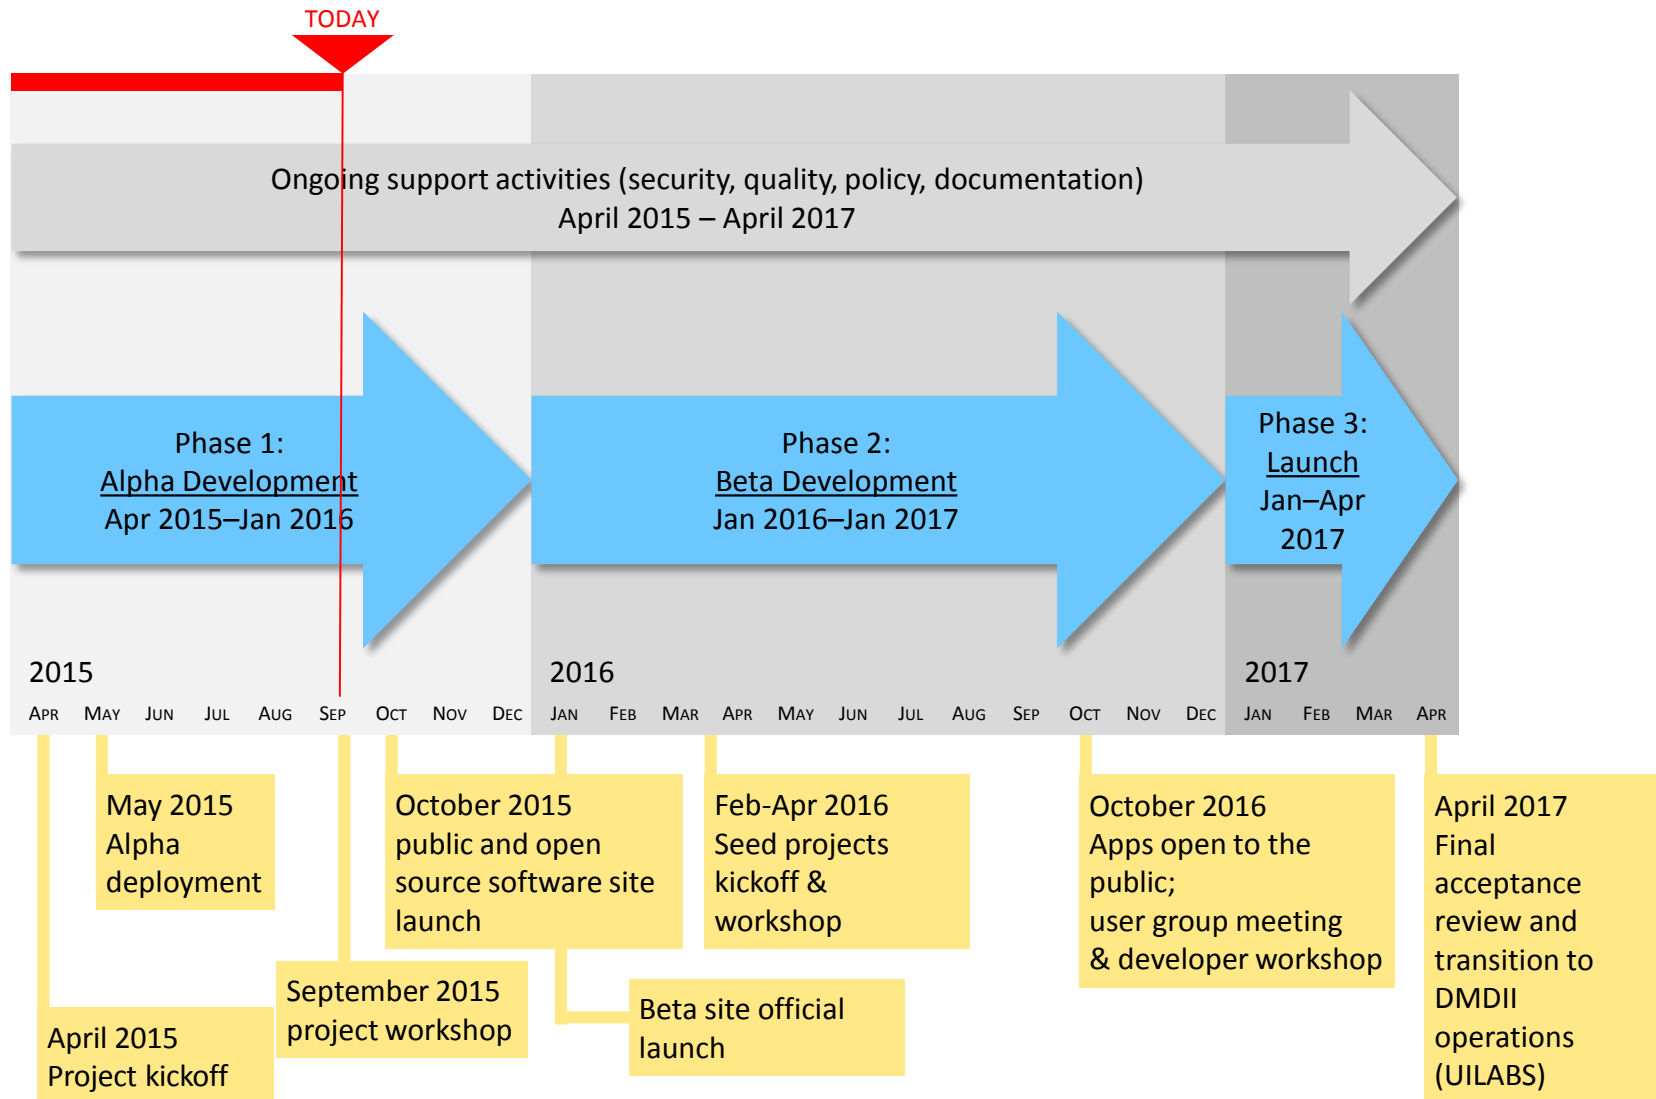

Event	Date
Call for white papers released	21-Jul-2015
Workshop	23-Sep-2015
White papers due	28-Oct-2015
Selection / Cost Proposal solicitations released	18-Nov-2015
Cost Proposals due	18-Dec-2015
Project Award	18-Feb-2016

- Up to \$2,000,000 in funding
 - \$25k to \$200k awards
 - Minimum 1:1 cost share & membership
- All IP under an open source license (Apache2 for technical works)
- Teaming and SME participation strongly encouraged

Project Plan High-Level Timeline View

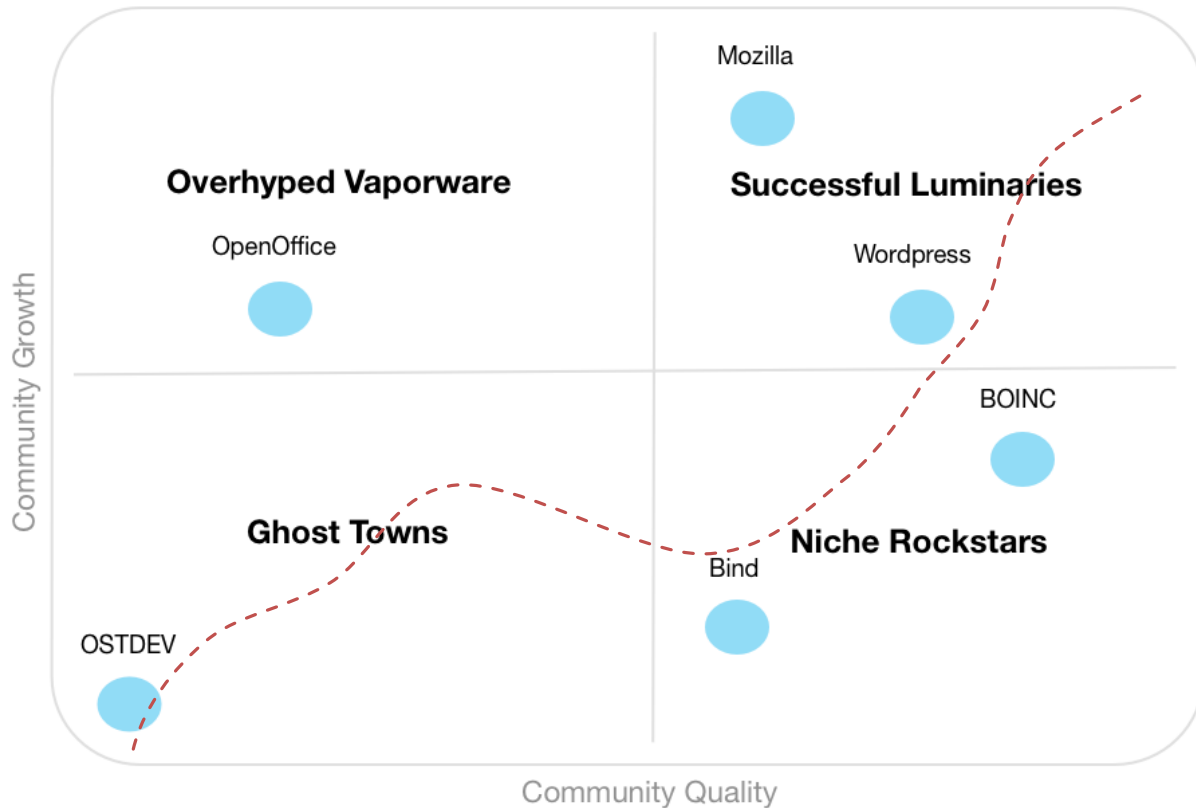

Community Building

100 – Fully Mature Open Source Project with Successful Business Ops

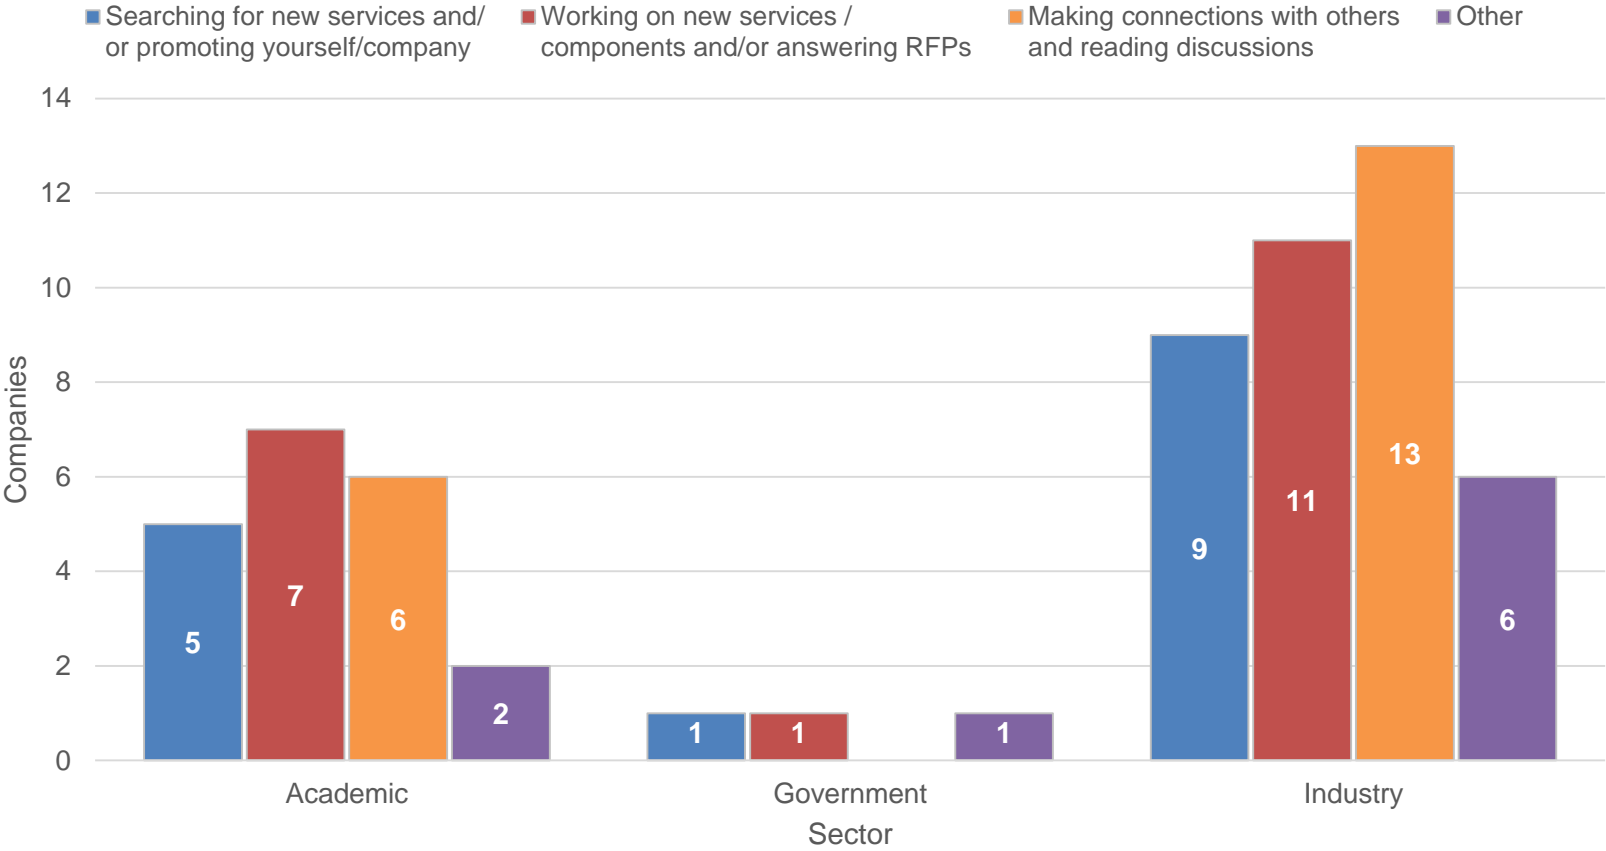

← 55.4 – Opened but not proven

0 – Not Even Pretending to be Open Source

DMC Survey Analysis

Frequent Uses for DMC by Sector

<https://dmcsurvey.typeform.com/to/pHGVNE>

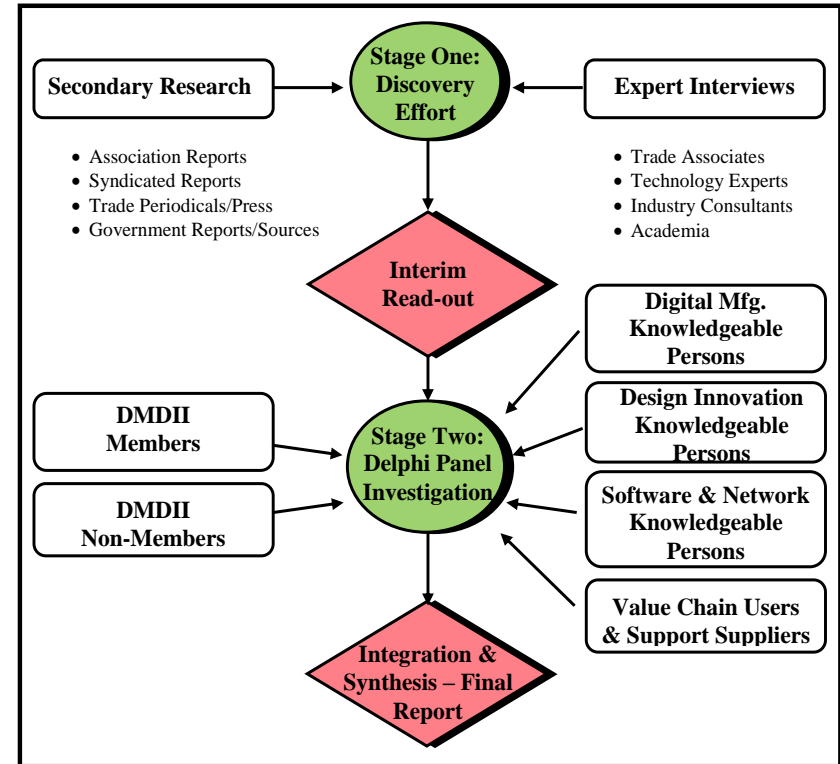

Delphi Stakeholder Research

Specific Research Objectives Associated with Three Areas of Investigation

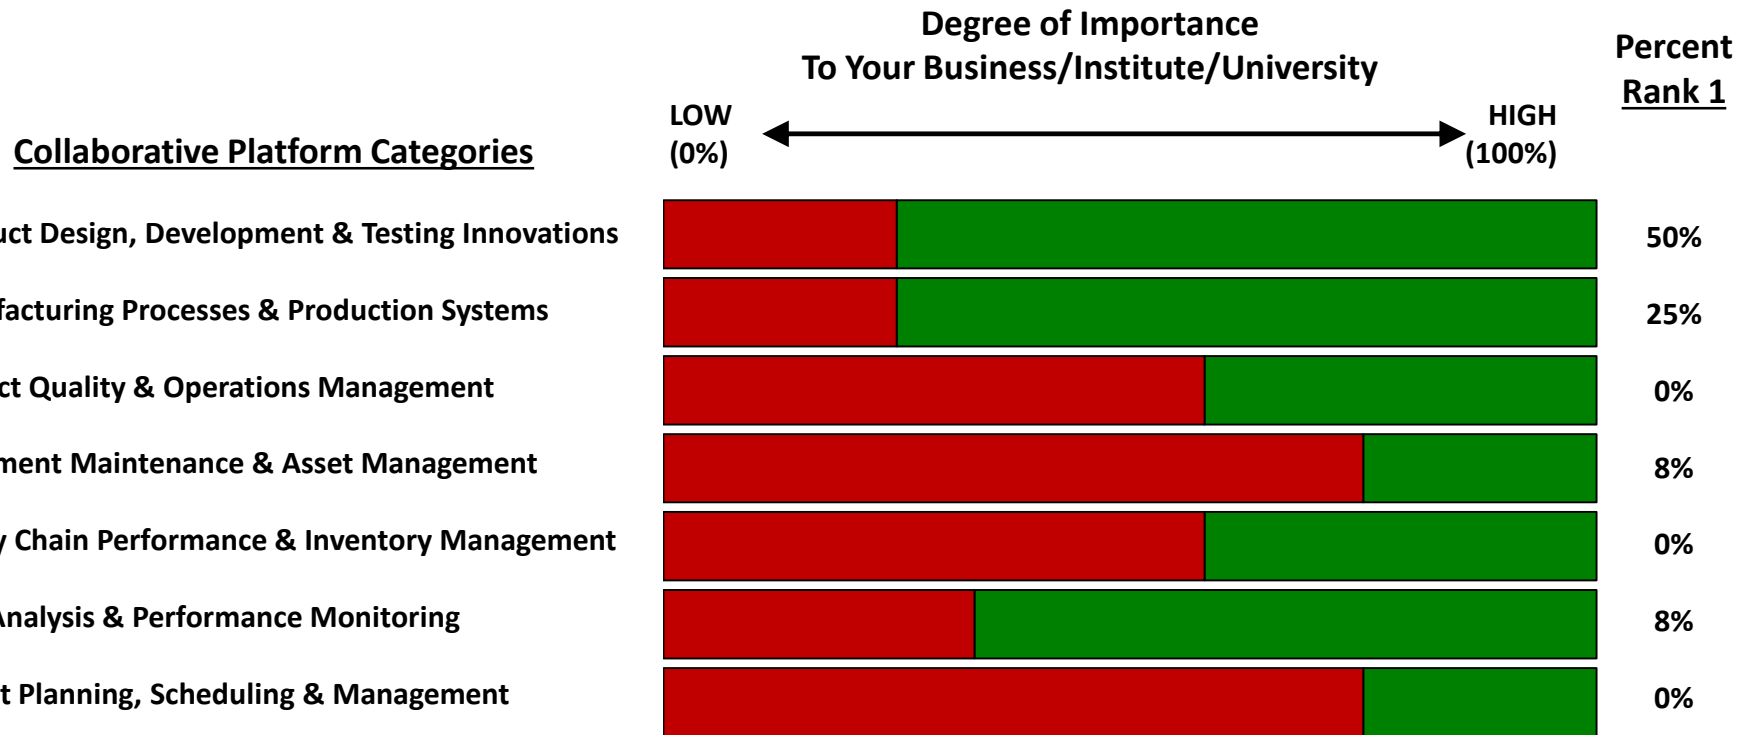

- Identify and document a list of key capabilities that people in the manufacturing sector would like to see the DMC platform possess.
- Document when, where and how the DMC would be collaboratively employed to enhance their digital manufacturing capabilities
 - product design and development innovations
 - manufacturing processes & production systems
 - supply chain performances & inventory management
 - data analysis & performance monitoring
 - project planning, scheduling and management
 - product quality & operations management
 - equipment maintenance & asset management
 - collaborative workforce enablement & development
 - shop floor automation
- Prioritize DMC capabilities on the basis of informed relative judgments of importance and value.

Two-Stage Research Approach

<http://www.projectdmc.org/about/roadmap/capabilities/>

Delphi Study Initial Results on Features

Security

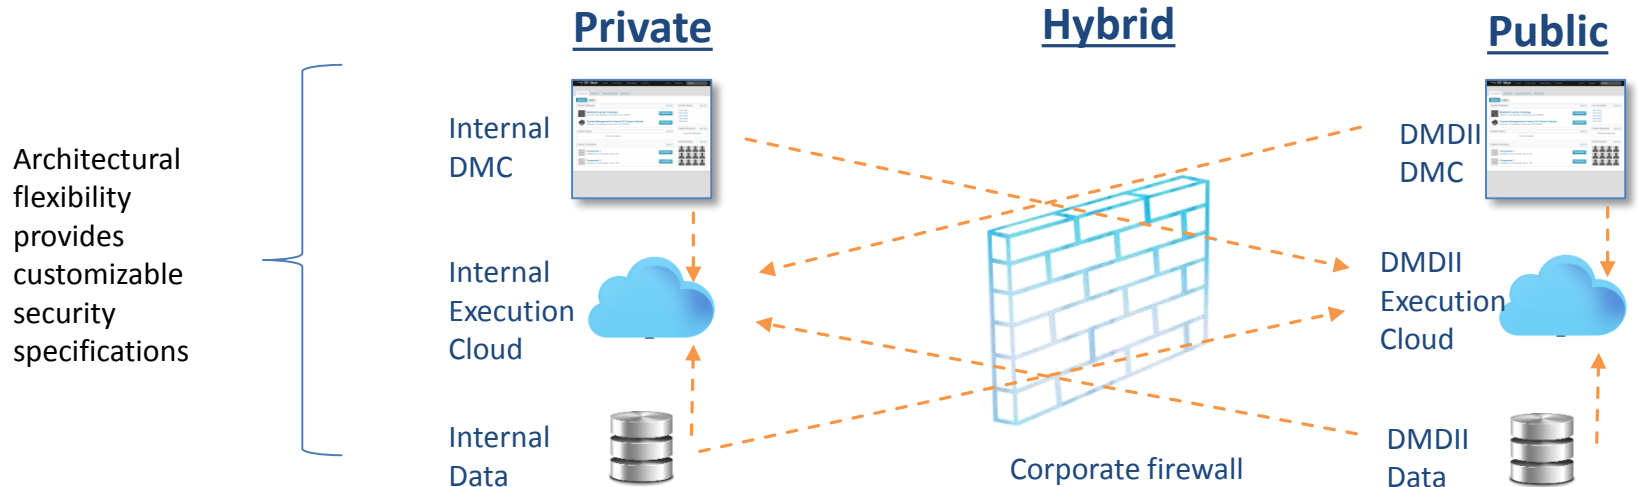

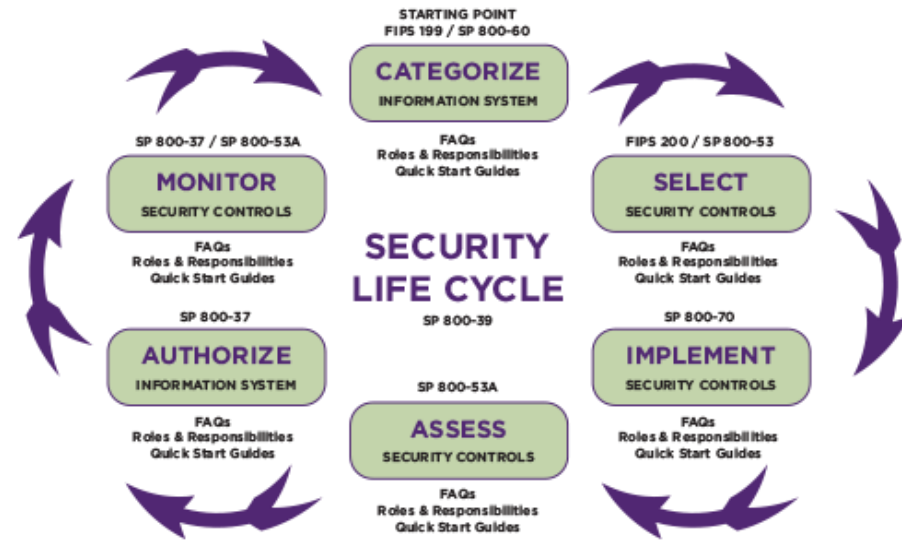

Private

Shared

Approach: Risk assessment and mitigation will be developed using NIST Risk Management Framework, and ISO compliance Matrix (iterative process version controlled).

Deployment guide being drafted to provide guidance on how additional security can be layered on top of the above-listed baseline we are providing.

Current Status: Security interviews started; security vulnerability testing started; over 350 test cases written; NIST controls audit underway.

Project Website

MISSION STATEMENT: The Digital Manufacturing Commons (DMC) is a free and open-source software project to develop a collaboration and engineering platform, which will enable plug-and-play functionality across the entire digital thread from product development to manufacturing and services.
